

Invest in AI-Powered Medical Diagnostics: US Capital Global Securities Announces \$25M Offering for Scanbo Technologies, Inc.

Explore a unique investment opportunity in Scanbo Technologies, a MedTech and AI diagnostics company delivering rapid, ultra-portable point-of-care testing powered by artificial intelligence.

SAN FRANCISCO, JANUARY 2026 – US Capital Global Securities LLC, an SEC-registered affiliate of the global financial group **US Capital Global**, is pleased to present eligible investors with the opportunity to participate in a \$25 million equity offering for Scanbo Technologies, Inc. (“Scanbo” or the “Company”), a MedTech and AI diagnostics firm redefining point-of-care testing.

Scanbo delivers fast, accurate, and affordable diagnostic results through a single, ultra-portable device powered by proprietary AI. The platform provides vital health insights in under five minutes, supporting faster clinical decisions, reducing diagnostic costs, and expanding access to primary care—particularly in underserved and resource-limited settings.

“We’re addressing a clear and urgent need in healthcare: fast, reliable diagnostics at the point of care,” said Ashissh Raichura, Founder and CEO of Scanbo. “Our platform delivers results in minutes, reduces costs, and expands access—especially in underserved regions. Our scalable device ecosystem and AI capabilities open new pathways for better outcomes and long-term growth.”

“Scanbo has developed and commercialized a robust diagnostic platform already gaining traction across global markets,” said **Lisa Terk**, Senior Vice President at US Capital Global. “With growing device deployments, expanding test capabilities, and a strong international pipeline, the Company is poised to scale its footprint significantly. We are delighted to support Scanbo’s \$25 million equity raise and **invite eligible investors to review this opportunity.**”

About Scanbo Technologies, Inc.

Established in 2019, Scanbo develops integrated diagnostic solutions that streamline clinical decision-making and reduce reliance on traditional lab infrastructure. Its platform combines sensor-based testing, AI analysis, and secure digital connectivity to support timely triage, chronic condition monitoring, and seamless data sharing—empowering healthcare providers to deliver more efficient, data-informed care across diverse settings.
