

Powering the AI Economy: US Capital Global Securities Announces \$54.5M Investment Opportunity for Fenrir Infrastructure Partners

Explore an investment opportunity in scalable offshore baseload power solutions designed to support the accelerating energy demands of AI data centers and critical grid markets.

SAN FRANCISCO, APRIL 2026 – US Capital Global Securities LLC, the SEC-registered broker-dealer affiliate of the global financial group **US Capital Global**, is pleased to present eligible investors with the opportunity to participate in a \$54.5 million equity investment opportunity in Fenrir Infrastructure Partners (“FIP” or the “Company”).

FIP is a US-based fund management firm focused on private equity investments in the sustainable energy sector and related growth technologies. Through its portfolio companies, FIP is developing offshore baseload power infrastructure designed to meet the growing electricity demands of large-scale AI data centers, utilities, and industrial energy offtakers.

The Company’s strategy centers on the deployment of modular offshore pumped hydro power plants through a diversified structure of single-purpose vehicles (SPVs), enabling scalable project development while maximizing the value of its proprietary intellectual property portfolio. Its initial development project, the Mjolnir Offshore Power Project, is a 5 MW commercial demonstration system located offshore Louisiana, with a broader long-term objective of building a multi-gigawatt fleet of offshore baseload generation assets.

“Artificial intelligence, cloud computing, and next-generation data infrastructure are driving unprecedented demand for reliable baseload power,” said Eirik Skaaren, Chairman and CEO of FIP. “Our objective is to provide scalable, sustainable offshore power solutions that can support this accelerating demand while reducing dependency on conventional fossil-fuel generation. By combining patented offshore pumped hydro technology with a flexible SPV-based deployment model, we aim to build critical infrastructure for the future energy economy.”

“Fenrir Infrastructure Partners is addressing one of the most important infrastructure themes of this decade: the growing intersection of energy demand and AI-driven digital infrastructure,” said **Charles Towle**, CEO of US Capital Global Securities LLC. “With its innovative offshore baseload power platform, experienced management team, and scalable project pipeline, the Company represents a compelling opportunity in sustainable infrastructure development. We are pleased to be assisting Fenrir Infrastructure Partners with this investment opportunity and **invite eligible investors to learn more.**”

About Fenrir Infrastructure Partners

Fenrir Infrastructure Partners is a US-based private fund manager focused on investments in edge data centers, sustainable energy infrastructure, and other growth technologies. The edge compute market is in high demand, and to achieve the best possible GPU rates, the fund managed by FIP will focus on major coastal cities, such as Los Angeles, San Francisco, New York, and Boston. It does this by repurposing existing oil platforms close to the coast, from which processed data is sent to shore as soon as the servers are sent offshore. Onshore data centers are exposed to waiting periods of 3–7 years for grid connections, but with the offshore patents that the fund holds through its portfolio companies, it is possible to bypass the grid constraints entirely. Its long-term vision includes the development of a 10 GW fleet of offshore generation assets by 2035. To learn more, visit www.fip.fund.

About US Capital Global

US Capital Global Securities LLC (“USCGS”) serves as the FINRA-member broker-dealer division of US Capital Global, specializing in facilitating growth-stage investments. Since 1998, US Capital Global has been dedicated to providing lower middle market businesses and investors with sophisticated investment opportunities.
