*Opportunity to invest in Canadian disruptive CleanTech company developing hydrokinetic renewable energy systems is now open to eligible investors.*

SAN FRANCISCO, MARCH 2022 – **US Capital Global Securities LLC**, an affiliate of US Capital Global, is offering eligible investors an investment opportunity of up to \$15 million in **Waterotor Energy Technologies, Inc.** (“Waterotor”). Waterotor is a Canadian hydrokinetic energy company focused on providing low-cost renewable electricity harnessed from slow-moving water or ocean currents. Waterotor’s breakthrough patented, economically disruptive, clean technology converts moving currents in rivers, canals, oceans, and tidal flows into 24/7 on- and off-grid renewable energy.

US Capital Global is a full-service private financial group with an established track record in investment banking, asset management, and capital formation services. The group provides sophisticated debt,

equity, and investment products to lower middle market companies and investors. All securities are offered by the group through its FINRA-member, SEC-registered broker-dealer affiliate, **US Capital Global Securities LLC**.

With an environmentally friendly design that is easy to manufacture, Waterotor's commercial units are affordable, reliable, and sustainable, providing maximum energy from water, even while operating under ice. It is the only solution of its kind in North America that utilizes water flows below 4 mph, which represents most of the flowing water on the planet. The company has a significant global IP estate, as well as units deployed in an ongoing commercial pilot validated by the Canadian Navy.

"After 10 years of development we are proud to unveil our breakthrough creation, the 'Big Cajun', a 20-megawatt hybrid ocean energy-generating system," said Waterotor CEO, Fred Ferguson. "This disruptive technology challenges the oil and gas industry's existing dependence on diesel-generated energy, which consumes over 33,000 gallons of fossil fuels per day at over \$70 million per year. Our technology's unique rotor designed with low-impact materials allows the industry to significantly reduce its carbon footprint while drastically reducing costs."

"As many as 1.2 billion people in the world go without energy, while 800 million are dependent on high-cost, polluting, finite fossil fuels," said **Charles Towle**, CEO at US Capital Global Securities. "Waterotor's ground-breaking technology can harness enormous amounts of clean energy without interruption, at a low price point. With the ability to service communities around the world, especially those in need of inexpensive electricity, Waterotor's solution is accessible, affordable, and renewable. If you are interested in Waterotor, the opportunity to participate in this \$15 million common stock offering is now **open to eligible investors.**"

## **About Waterotor Energy Technologies, Inc.**

Founded in 2011, Waterotor is an IP development and systems management company responsible for the development of an advanced, precisely defined, patented, proven, small to large version technology. Waterotor's breakthrough, economically disruptive clean technology converts low-head, low-flow energy in very slow-moving water into affordable and globally accessible 24/7 on- and off-grid renewable energy.
